LOGIC MODEL

KEYSTONE FAMILY HOUSING PARTNERS

Keystone Family Housing: Rapid Rehousing, Stay Housed, and Fresh Start Furniture

THEORY OF CHANGE

If Keystone helps families move quickly into permanent housing with time-limited rent assistance, move-in essentials, and voluntary, individualized case management, then families can settle into housing and address barriers that threaten stability. This support is intended to help families remain housed after assistance ends, though housing stability also depends on factors outside Keystone's control.

LOGIC MODEL

INPUTS	ACTIVITIES	OUTPUTS	SHORT-TERM OUTCOMES	LONG-TERM OUTCOMES
• Executive director, four case managers, housing locator, and part-time finance manager • Rental assistance and program operating funds • About 20 volunteers and donated furniture • Small office and regional homeless response system • Referrals through regional coordinated entry	• Identify apartments and help families move into permanent housing • Pay security deposits and first month's rent, then step down rent help for up to 12 months • Offer voluntary, individualized Stay Housed case management through home visits; frequency is adjusted with each family, with more frequent visits early when appropriate • Help families address budgeting, landlord issues, benefits, child care, and school enrollment based on their priorities • Provide Fresh Start Furniture move-in support by furnishing apartments before move-in	• Families enrolled • Families moved into permanent housing and days from enrollment to move-in • Rental assistance payments and duration of assistance • Stay Housed home visits completed • Apartments furnished before move-in	• Families move from homelessness into permanent housing • Families report greater confidence taking a next step to address a rent or landlord issue • Parents report feeling more in control and less stressed • Parents can identify where to seek help for at least one priority need they selected	• Families remain housed after time-limited rental assistance ends • Fewer families return to homelessness or shelter

ASSUMPTIONS & EXTERNAL FACTORS

ASSUMPTIONS

- Families can access suitable, affordable apartments in the local housing market
- Families can choose whether to engage in case management and identify supports that fit their needs
- Rent assistance, practical move-in support, and case management can address different barriers to housing stability

EXTERNAL FACTORS

- Availability and affordability of rental housing
- Changes in household income, employment, and benefit access
- Landlord decisions and housing conditions
- Availability of child care, school supports, and other community resources

MEASUREMENT PLAN

This plan pairs existing program/HMIS records with a brief, voluntary participant check-in to track housing move-in, families' confidence, stress, and resource knowledge. It also checks families' housing status 12 months after move-in, where follow-up is feasible; results are reported as outcomes Keystone contributes to, not outcomes it alone causes. The participant survey has four recommended questions, below the requested limit of about eight.

METRIC	OUTCOME IT TRACKS	METHOD	WHEN	HOW IT'S SCORED
Permanent-housing move-in and time to move-in	Families move from homelessness into permanent housing	Program records	Update enrollment and move-in records as they occur; review by reporting period using a consistent cohort and observation window. Separately show households not yet observed for the full window.	Report the count and share of families in the fully observed cohort who moved into permanent housing, plus median days from enrollment to move-in among those who moved in. Show the cohort size and the not-yet-fully-observed count; align definitions with applicable HMIS and award rules.
Confidence addressing a rent or landlord issue	Families report greater confidence taking a next step to address a rent or landlord issue	Participant survey	At program entry and at a consistent later point, such as program exit or the end of case-management support. Ask the same hypothetical scenario and item both times, after urgent intake needs are addressed.	Report the item's score distribution and median change for participants with paired answers, alongside baseline, follow-up, paired-response, and missing counts. Do not use a 1-point improvement threshold as a validated measure of meaningful change.
Parent-reported stress	Parents report feeling more in control and less stressed	Participant survey	At program entry and at the same later point used for the other check-in items; use the same past-month time frame and response choices.	Report responses to each item separately, with paired-response and missing counts. Lower frequency on the two included stress items suggests improvement. These are locally written items, not a validated scale; do not calculate a PSS-10 score. Confirm permission terms before reproducing or adapting any PSS-10 wording.
Knowing where to seek help for a chosen need	Parents can identify where to seek help for at least one priority need they selected	Participant survey	At program entry and at the same later point used for the other check-in items. Compare	Report Yes, No, skipped, and missing responses separately. For paired comparisons, include only participants

BRIEF PARTICIPANT CHECK-IN

Participant survey · Offer at entry and at a consistent later point, after urgent intake needs are addressed. Use a short script: taking part is voluntary, any question may be skipped, and answers will not affect services. Offer read-aloud and translated options where available; use the same wording and response choices each time. The four included questions cover confidence, stress, and knowledge of where to seek help. Keystone chooses to add them.

CONFIDENCE ADDRESSING A RENT OR LANDLORD ISSUE

• Think about this same situation each time: you have a problem paying rent or with your landlord. How confident are you that you can take one next step to address it? [0–10 rating] (S20)

PARENT-REPORTED STRESS

• In the past month, how often did you feel that problems were too much to handle? [Never → Always (1–5)] (S21, S22)

• In the past month, how often did you feel worried about things you could not control? [Never → Always (1–5)] (S21, S22)

KNOWING WHERE TO SEEK HELP FOR A CHOSEN NEED

• If you wanted help with a need you chose, do you know who you could contact? [Yes / No] (S23, S24)

HOUSING OUTCOMES AND FOLLOW-UP RECORDS

Program records • Use program records/HMIS throughout enrollment and move-in, with consistent cohort definitions and observation windows. Prioritize 12-month status after physical move-in; use a consent-based preferred contact method, limited attempts, and report due, contacted, known, and unknown status separately.

PERMANENT-HOUSING MOVE-IN AND TIME TO MOVE-IN

- How many families in the reporting cohort have had the full, comparable observation period to move into housing? [Number] (S17, S18)
- How many families in that cohort moved into permanent housing during the observation period? [Number] (S17, S18, S19)
- Among families who moved in, what was the median number of days from enrollment to move-in? [Number] (S17, S19)

HOUSING STATUS 12 MONTHS AFTER MOVE-IN

- How many families are due for a 12-month housing-status follow-up after move-in? [Number] (S17, S18)
- How many families due for follow-up were contacted, and how many had a known housing status? [Number] (S18, S25, S26)
- How many families with a known status were in permanent housing at follow-up? [Number] (S18, S19)
- How many families with a known status were staying in shelter, outside, or another place not meant for housing? [Number] (S18, S25, S26)
- How many families with a known status were in another or unstable housing situation? [Number] (S18, S19)

HOW THIS LINES UP WITH FUNDERS

- The model centers rapid exits to permanent housing and fewer returns to homelessness, common CoC and RRH reporting priorities. (S2, S4, S6)
- Fresh Start Furniture is framed as a practical move-in support that contributes to housing setup and family well-being, rather than as an end in itself. (S8)
- The model keeps case management and other supports tailored to household priorities, consistent with person-centered RRH and coordinated-access approaches. (S3, S9, S16)
